

THE LIGHT OF THE WORLD LEADER'S NOTES

SECTION I.

In many religions and in ceremonies connected with those religions, light such as fire, lamps and candles, is important. The summer and winter solstices are times of celebration in many present day cultures, as well as in many ancient cultures. Some internationals may not have thought specifically about any special meaning for light in their cultures, but with time may identify some meanings.

In American culture light and dark, white and black, are very clearly attached to good and bad. Think of the old western movies. The *good guy* rode a white horse and had a white hat, the *bad guy* wore black. Witches wear black clothing, and saints are depicted with shining orbs of white light around their heads. Angels appear in dazzling white clothing.

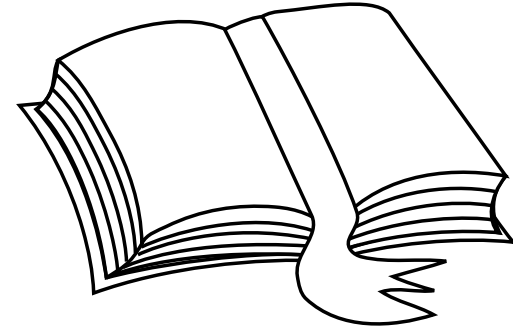

In many countries, such as India for example, light skin is more highly prized than dark skin. They have whitening creams to lighten their skin. Think of the old name for African Americans, *blacks*. It was considered derogatory, because the African American was a slave.

SECTION II.

The Bible says that without God we live in *darkness*. We are sinful people. Note that the Proverbs verse also says that people stumbled around. Even evil people do not usually choose to stumble around. The implication is most likely that they are ignorant as well as evil.

SECTION IV.

Many different people in different ages believed they were spiritually *enlightened*. We must be aware that people from other cultures may think that they and their cultures are already enlightened. You might explore the difference between *being enlightened* and being the light. Buddha was enlightened, but he never claimed to BE the light.
